

25 August 2010

To Whom It May Concern,

RE: Green Guard for Organic Compliance

It is ACO's official position to announce that **Green Guard ULV** and **Green Guard SC Premium** Formulation is compliant with the Australian Organic Standard (hereinafter referred as AOS) and the USDA NOP (National Organic Program).

Green Guard SC This is not permitted by AQIS. Also, regrettably, we were not able to confirm compliance with the USDA NOP.

	Green Guard ULV	Green Guard SC	Green Guard SC Premium
AOS	√	X	√
USDA NOP	√	X	√

This confirmation is based on information supplied by Becker Underwood and for the **2010 season only**. The purchaser should also confirm with Becker Underwood that the formulation and associated application aids have not changed in formulation this season to ensure compliance with organic standards.

We would like to keep working with the industry on this matter. If you have any queries or concerns, please feel free to contact the ACO client support office (07 3350 5706) at anytime.

Yours Sincerely,

Akiko Nicholls
Managing Director
